Hardware																										
Move the notes from "warehouse" to redmine.																										
Create BOM creator script with warehouse (...)																										
Cablemeter																										
PCB: missing info for 3V																										
CANBuz																										
Create sinewave for DAC/DMA																										
Helios																										
Check I2C pullups																										
Driver board: No level shifter for I2C																										
Calculate voltage-divider for "Enable" (...)																										
Eval-RTC: Strange behaviour when battery (...)																										
mainSwitch																										
PCB routing problem																										
Switch via photodiode																										
Power supply on CANBus is very poor																										
Wakeup-Button is not working																										
Verseion 2: more power, RTC																										
LM25056: Current calculated wrongly																										
Minutnik																										
Buttons do not fit																										
Minutnik elnk																										
Does UART-RX need Pullu por -down?																										
Minutnik elnk - v0.2.x																										
consumption tests completely (...)																										
Yellow and red LEDs are quite (...)																										
Power consumption too high																										
Are both wakeups working correctly																										

NUC64DEBUG - use bigger buttons NUC64DEBUG - v0.3.x - BOOT0 Button pulls pin low instead (...) Rufa - Footprint fuer thermocouple-Kupplung (...) - Introduce more noise filtering - One pin is completely missing - Housing sensemux - Bringup HW v0.2.x Software Campo - implement hwdatas stterm command - create custom targets to cmake file (...) - implement font converter Biwak - implement SPI DMA transmit - Implement DMA USB - Clean up heart-beat-LED-code - Test implementation of eventLoop (...) - Document tips and tricks - Verify dynamic sleep - MAX31855: Negative values are not (...) Biwak - v2.17.0 - use 128 bit UID - Implement dynamic sleep - Blink modes: Use slower timings (...) - Host GUI: Pressing button (...) - Allow more retain containers (...) - Retain: Use bigger data type (...) - CRC: Make methods const. - Touch: Whole processing is (...) Biwak - v2.18.0	
--	--

Simulate touch display on (...) Cordyceps Cordyceps - v99.0.0 Show marker in plots Show event marker in plots Kokon Check board id and revision before (...) libcampo bringup: Create test to write internal (...) unit tests: parse hwinfo files campo.sh: verify "release" function campo.sh: add changeLogSubmodules hwdata: clean up Vagus: CAN: use filters libcampo - v0.99.0 Bringup: verify/calibrate (...) liblepto CMake: No install target Make it compile for host computer liblepto - v0.6.1 Implement CONFIG_LEPTO_RING_CUSTOM_DATA Add unit tests for strings. Support expandable lists CList: Add method for searching (...) libocelli Use changeable framework libocelli - v99.0.0 implement png reader libscapus bme680: calculate absolute humidity theme_noto theme_noto - v0.2.0 create const icon references campoTemplate	
--	--

There is no actual template for README.md Git history is not reset Canbridge - Retransmit Messages - Check RSSI instead of delaying - Inject heartbeat from radio, expect (...) - Expect section-id to vanish from section-mask (...) - Inject an message from radio, expect (...) - Inject same message from radio, expect (...) - Inject message via CAN, expect it on (...) - Inject message via CAN, expect it on (...) - Enable source section-id; Inject message (...) - Enable source section-id; Inject message (...) Canbridge - 0.1.0 - Multi-Nodes - Measure current consumption in (...) Canbridge - 0.2.0 - Use listening mode Canbridge - v0.0.5 - support bootcounter in config CANDis - change TDT command to set/get time/date (...) CANDis - v0.7.1 - When switchin from "minutnik running (...) - Reading touch calibration is very (...) CANDis - v0.8.0 - USB CDC tester CANDis - v0.99.0 - Evaluate RTC calibration CANHub - Connectors: tolerate wrong sizes CANHub - v0.2.0 - Implement Heartbeat - implement monitor mode	CANHub
--	---------------

Dynamic port assigning CANHub - v0.3.0 - multiple servers - Loop detection - Add websocket server CANIO - Send alarm on I2C error CANRec CANRec - v0.3.0 - Find first replay block fast - Specify timestamps CANSwitch - timeout warning - Fading out before timeout - Send keep-alive - Send wanna-sleep - Test arena generated handler structure fosh fosh - v0.3.0 - implement generic subcommands - Run on host natively - Add support for backspace key Mainswitch - Low voltage alert - timeout shutdown - An keep-awake-event via CAN should extend (...) - Shutdown command miniminutnik - hw v0.2.x: add quirk to board file for (...) Minutnik elnk Minutnik elnk - v0.99.0 - Font in SPI-Flash Mito - implement validate mode	
--	--

MWidgets - CPlotter: show date when time range (...) PhonyBL - Implement big Statemachine Rufa - Verify smoothener - Simplify smoothener - Add fast readout command Sensemux SW - RTC does not store date - evaluate more values - Why does mainswitch stabilize values? Squeezer - Readme is missing - Errors are not handled reliable TCB - GCC 15 is out - TCB - v1.10.0 - Generate list of packages - TCB - v1.6.6 - autoconf directory from host is (...) - activate chroot tests again - python-host: on debian pip and (...) - TCB - v1.8.3 - Not all binaries get patched to (...) - TCB - v1.9.0 - Python from host is involved TDTPrompt - TDTPrompt - v0.2.0 - Show CANHub connector status on (...) pics - bilder - pic2
